Examiner's Amendment and
Examiner's Statement of Reasons for Allowance
Allowance (11/30/05)

1. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this Examiner's amendment was given in a telephone interview with Mr. Jackson.

2. The application has been amended as follows:

Cancel claims 10-21.

The claims were amended to read as follows:

1. (Currently amended) An automotive interior trim assembly, comprising:

a substrate; and

an ashtray coupled to said substrate and adapted to store one or more items, said ashtray comprising:

a compartment body defining a cavity ~~adapted to store the one or more items~~ and having an opening for gaining access to said cavity, said compartment body including at least one body connecting member integrally formed

therein made from a first material; and

a cover including at least one cover connecting member integrally formed therein and made from a second material having a different melting point from said first material, said at least one body connecting member cooperating with said at least one cover connecting member to couple said cover to said compartment body, a portion of either said at least one body connecting member or said at least one cover connecting member being molded over a corresponding portion of said at least one body or cover connecting member, said cover being moveable between an open position, wherein said cavity is accessible through said opening, and a closed position, wherein said cover overlies said opening.

2. (Original) The trim assembly of claim 1, wherein said at least one body connecting member comprises at least one projecting portion extending therefrom, and wherein said at least one cover connecting member comprises at least one receiving portion therein which receives said at least one projecting portion.

3. (Original) The trim assembly of claim 2, wherein said at least one projecting

portion defines a pin.

4. (Original) The trim assembly of claim 2, wherein said at least one receiving portion defines a bore.

5. (Original) The trim assembly of claim 1, wherein said at least one body connecting member includes a pair of spaced apart connecting members, each said pair of spaced apart connecting members having at least one projecting portion defining a pin having an enlarged distal end defining a circular portion, and wherein said at least one cover connecting member includes one connecting member, said cover connecting member including a pair of spaced apart receiving portions with each defining a bore having an enlarged receiving portion defining a circular recess, each said recess receiving one of said circular portions to couple said cover to said compartment body.

6. (Original) The trim assembly of claim 1, wherein said cover is pivotally movable between said open and closed position.

7. (Original) The trim assembly of claim 1, wherein said first material is polycarbonate/acrylonitrile butadiene styrene and the second material is selected from the group consisting of polypropylene, polyoxymethylene, and polyamide 6.
8. (Original) The trim assembly of claim 1, wherein said first material has a higher melting point than said second material.
9. (Original) The trim assembly of claim 1 configured as a door panel.

3. The following is an Examiner's statement of reasons for allowance:

The primary reason for the allowance of the claims in this case, is the inclusion of the limitation "a substrate; and an ashtray coupled to said substrate and adapted to store one or more items, said ashtray comprising: a compartment body defining a cavity and having an opening for gaining access to said cavity, said compartment body including at least one body connecting member integrally formed therein made from a first material; and a cover including at least one cover connecting member integrally formed therein and made from a second material having a different melting point from said first material, said at least one body connecting member cooperating with said at least one cover connecting member to couple said cover to said compartment body, a portion of either said at least one body connecting member or said at least one cover connecting member being molded

over a corresponding portion of said at least one body or cover connecting member, said cover being moveable between an open position, wherein said cavity is accessible through said opening, and a closed position, wherein said cover overlies said opening" in the independent claim, in combination with the other recited limitations in claims supported by this application, which are not found in the prior art of record.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications should be directed to Primary Examiner Kiran B. Patel whose telephone number is 571-272-6665.
